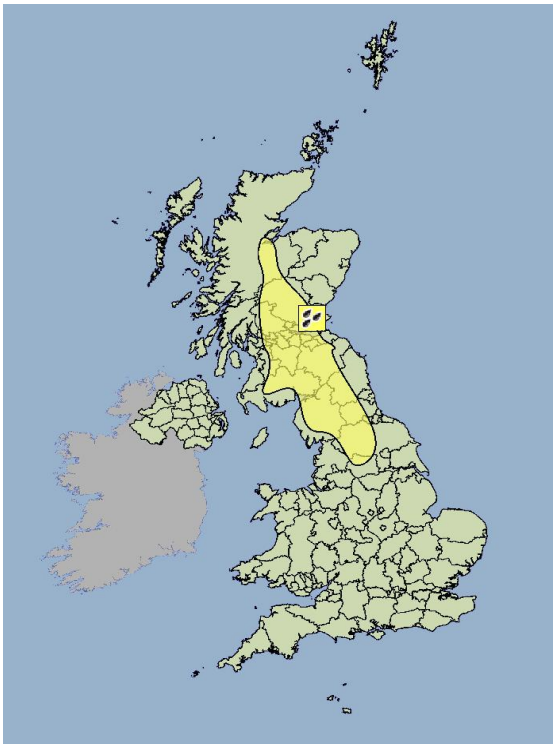
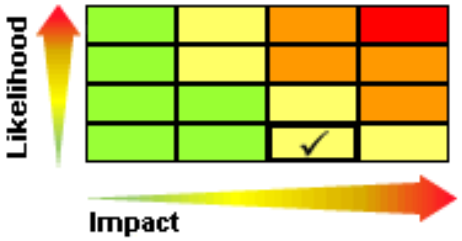
National Severe Weather Warning Service





Chief Forecasters Assessment
Warm, moist air will turn unstable as the ground heats up, releasing heavy, thundery showers. Many of these will be over high ground, but will drift into lower-lying areas too. There could be more than 20 mm in the hour locally, with more than 50 mm in a few hours possible.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **14:00 on Tue, 07th Jun 2016** until **21:00 on Tue, 07th Jun 2016**

Heavy, thundery showers will break out on Tuesday afternoon over parts of northern England and Scotland. These will be slow moving, and whilst many places will miss the worst, they will bring some localised torrential downpours. The public should be aware of the possibility of surface water flooding and travel disruption.
